13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Upon wellhead inspection Energen Resources had been performing Bradenhead tests on a csg valve, not the Bradenhead. Upon digging down to the 13-3/8" x 9-5/8" interval it was discovered that there was no Bradenhead. The welds between the 13-3/8" and 9-5/8" were strengthened and a Bradenhead was hot tapped in and plumbed to the surface.

If braden head test was conducted, please provide results. If not test was performed, please conduct test by 8/11/14, and provide results.
