Describe Cause of Problem and Remedial Action Taken.\*  
**A release of unknown causes was discovered to have traveled off location. Evidence of water had breached the berm through a hole at the base, and water contaminated with chlorides had traveled off location greater than 300 feet. Current investigation has ruled out a tank or pipeline release. Reports of standing water (attributed to rainwater) within the berm during the heavy rains around September 26th were reported. The hole in the berm was repaired, and environmental assessment ordered.**

Describe Area Affected and Cleanup Action Taken.\*  
**ConocoPhillips will assess the soil to determine a path forward for clean-up if necessary.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
