13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Elm Ridge Exploration Co LLC plans to prepare the wellbore so the well can be contained during the remaining stimulation operations for WPX's Chaco #206H and Chaco #207H. We will be setting a retrievable bridge plug with a wireline truck 100' above the top per. Perfs run from 5000' to 5498'. The bridge plug will be set at 4900'. After we set the bridge plug and the wellbore is blown down we will put a new 4 1/2" full opening port casing valve on top of wellhead. We will also be replacing the bradenhead valve. The bradenhead and wellhead will both be double valve. After the work is complete WPX will be able to resume their stimulation operations. We will have a flow back tank on location at all times until the stimulation operations are complete.

14. I hereby certify that the foregoing is true and correct
