FORM APPROVED
OMB No. 1004-0137
Expires: July 31, 2010Farmington SUNDRY NOTICES AND REPORTS ON WELLS
Do not use this form for proposals to drill or to re-enter an
abandoned well. Use Form 3160-3 (APD) for such proposals.

5. Lease Serial No.

SF-079004

6. If Indian, Allottee or Tribe Name

RCUD SEP 24 '14
OIL CONS. DIV.

SUBMIT IN TRIPLICATE - Other instructions on page 2.

1. Type of Well

☐ Oil Well☒ Gas Well☐ Other

7. If Unit of CA/Agreement, Name and/or No.

San Juan 32-8 Unit

8. Well Name and No.

San Juan 32-8 Unit 223A

9. API Well No.

30-045-32152

3a. Address

PO Box 4289, Farmington, NM 87499

3b. Phone No. (include area code)

(505) 326-9700

10. Field and Pool or Exploratory Area

Basin Fruitland Coal

4. Location of Well (Footage, Sec., T., R., M., or Survey Description)

Surface Unit E (SWNW), 1745' FNL & 815' FWL, Sec. 10, T31N, R8W

11. Country or Parish, State

San Juan, New Mexico

DIST. 3

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof.

If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once Testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

ConocoPhillips proposes to utilize a closed loop system to accommodate a liner clean out on the subject well. Plans are to pull the rod string, tubing and liner, clean out open hole, run and perforate liner, run tubing and new insert pump. Plans include connecting a blooie line to the steel tank to handle any flowback fluids. For that reason a NMOCD-depression/BLM-pit is needed to help facilitate the flow into the tank. The start of the NMOCD-depression/BLM-pit will be located approximately 100' from the wellhead, approx. 6' deep x 10' wide x 40' long, with a ramp for a truck to set the tank. It will be filled with stockpiled soil once the rig has moved off. As a safety precaution we will line the NMOCD-depression/BLM-pit with plastic before laying down the blooie line. We don't anticipate any fluids in this NMOCD-depression/BLM-pit; all fluids will be fed into the steel tank.

The NMOCD was consulted and they concluded the depression is not deemed a pit.

14. I hereby certify that the foregoing is true and correct. Name (Printed/Typed)
