## APPLICATION FOR EXCEPTION TO NO-FLARE RULE 19.15.18.12

(See Rule 19.15.18.12 NMAC and Rule 19.15.7.37 NMAC)

OIL CONS. DIV DIST. 3

A. Applicant: **WPX Energy Production, LLC**

OCT 28 2014

whose address is: **P.O. Box 640, Aztec, NM 87410,**

hereby requests an exception to Rule 19.15.18.12 until 11/28/14, for the following described tank battery (or LACT):

Name of Lease: **NE CHACO COM #239H API-30-039-31204** Name of Pool: **Chaco Unit NE HZ (Oil) (330')**

Location of Battery: Unit Letter L Section 06 Township 23N Range 6W

Number of wells producing into battery 3

B. Based upon oil production of **150** barrels per day, the estimated volume  
of gas to be flared is **275 MCF/D**; Value: **\$963** per day.

C. Name and location of nearest gas gathering facility:

*\* See Attached Conditions*

**Beeline Gas Systems, Sec 12, T23N, R07W**

D. Distance        BUILT        Estimated cost of connection       

E. This exception is requested for the following reasons: WPX Energy requests authorization to flare this well due to an expected spike in nitrogen content above acceptable Beeline Gas Systems standards due to nearby frac activity on the NE CHACO COM #181H, NE CHACO COM #182H, NE CHACO COM #183H. As a result, WPX Energy is anticipating that the NE CHACO COM #239H may experience crossflow. If a crossflow event on the well results in nitrogen content above Beeline Gas Systems standards, flaring may begin as soon as 10/30/14 given approval. The well would flare for up to 30 days. Pipeline quality gas should be obtained within 30 days. A gas sample will be collected upon the confirmation of crossflow and sent to a third party for a gas analysis. The results of the gas analysis will be submitted upon receipt.

### OPERATOR

I hereby certify that the rules and regulations of the Oil Conservation Division have been complied with and that the information given above is true and complete to the best of my knowledge and belief.
