OIL CONS. DIV DIST. 3
OCT 21 2014

Describe Cause of Problem and Remedial Action Taken.*

On Thursday October 16 2014, lease operator drained water out of oil tank. When finished he mistakenly opened the valve all the way instead of closing and sealed the valve, draining 195.39 bbls out of oil tank, filling up fiberglass water tank w/ 37. 12 bbls and spilling 158.27 bbls onto the ground. Remediation will start in the next 2 to 5 days and will be completed according to Jicarilla Apache Oil & Gas Administration and NMOCD standards.

Describe Area Affected and Cleanup Action Taken.*

The area affected was the below grade tank and cellar it was placed in, approximately a 26' x 26' x 3' deep fenced area. Clean action taken: All of the oil was contained in the firewall on location. On 10-16-14 a vacuum truck picked up 148 bbls with a loss of 47 bbls. On 10-20-14 a steam cleaner was used to clean the soil and the inside/outside of the fiberglass tank. Another 11.27 bbls oil was recovered, total recovered 159.27 bbls. Clean up still in progress.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
