OIL CONS. DIV DIST. 3

This form is not to be used for reporting packer leakage tests in Southeast New Mexico

## **Oil Conservation Division**

Northwest New Mexico Packer-Leakage Test

JUN 16 2015

Revised June 10, 2003

Operator COP				Lease Name SAN JU			N JUAN 28-7 UNIT			Well No. 98
Location of Well	Unit Letter G		Sec	29	Twp	027N	Rge 007W		API #	30-039-06902
	Name of Re	eservoir o	or Pool		Typ of P			Method of Prod		Prod Medium
Upper Completion	MV		Gas		Flow		т	ubing		
Lower Completion			Gas			Artificial Lift		т	ubing	

## **Pre-Flow Shut-In Pressure Data**

Upper	Hour, Date, Shut-In	Length of Time Shut-In	SI Press. PSIG	Stabilized?(Yes or No)
Completion	5/28/2015	204 hours	341	Yes
Lower	Hour, Date, Shut-In	Length of Time Shut-In	SI Press. PSIG	Stabilized?(Yes or No)
Completion	5/28/2015	144 hours	543	Yes

Flow Test No. 1								
Commenced at:	6/3/2015		Zone Pro	oducing (Upper or Lo	ower): LOWER			
Time	Lapsed Time	PRES	SURE	Prod Zone				
(date/time)	Since*	Upper zone	Lower zone	Temperature	Remarks			
6/3/2015 9:56:30 AM	9	341	119	46				
6/4/2015 9:34:45 AM	33	341	107					
6/5/2015 12:40:58 PM	60	341	109	43				

Production rate during test

Oil:	BPOD Based on:	Bbls. In	Hrs.	Grav.	GOR	

Gas MCFPD; Test thru (Orifice or Meter)

## **Mid-Test Shut-In Pressure Data**

Upper Completion	Hour, Date, Shut-In	Length of Time Shut-In	SI Press. PSIG	Stabilized?(Yes or No)
Lower Completion	Hour, Date, Shut-In	Length of Time Shut-In	SI Press. PSIG	Stabilized?(Yes or No)

	RICT #3	· · · · · · · ·						
	NORT	THWEST NEWMEXICC	) PACKER LEAKAG	E TEST INSTRUCTI	ONS			
1. A packer leakage test shall be comme						was indicated during Flow Test No. 1. Procedure		
completion of the well, and annually thereafter as prescribed by the order authorizing the multiple completion. Such tests shall also be commenced on all multiple completions within seven days following recompletion and/or chemical or fracture treatment, and whenever remedial work has been done on a well during which the packer or								
the tubing have been disturbed. Tests shal requested by the Division.			en	7. Pressures for gas-zone tests must be measured on each zone with a deadweight pressure gauge at time				
			intervals as intervals du	follows: 3 hours tests: in ring the first hour thereof	mediately prior to the beg , and at hourly intervals th	inning of each flow period, at fifteen-minute hereafter, including one pressure measurement		
2. At least 72 hours prior to the comme Division in writing of the exact time the te			flow period	, at least one time during	each flow period (at appro	v tests: immediately prior to the beginning of each oximately the midway point) and immediately prior		
			which have	previously shown question	nable test data.	taken as desired, or may be requested on wells e test, shall be continuously measured and recorded		
3. The packer leakage test shall comme stabilization. Both zones shall remain shu			re with record	ing pressure gauges the a	ccuracy of which must be	checked at least twice, once at the beginning and If a well is a gas-oil or an oil-gas dual		
however, that they need not remain shut-in	i Francis		completion, the recording gauge shall be required on the oil zone only, with deadweight pressures as required above being taken on the gas zone.					

4. For Flow Test No. 1, one zone of the dual completion shall be produced at the normal rate of production while the other zone remains shut-in. Such test shall be continued for seven days in the case of a gas well and for 24 hours in the case of an oil well. Note: if, on an initial packer leakage test, a gas well is being flowed to the atmosphere due to lack of a pipeline connection the flow period shall be three hours.

5. Following completion of Flow Test No. 1, the well shall again be shut-in, in accordance with Paragraph 3 above.

8. The results of the above-described tests shall be filed in triplicate within 15 days after completion of the test. Tests shall be filed with the Aztec District Office of the New Mexico Oil Conservation Division on Northwest New Mexico Packer Leakage Test Form Revised 10-01-78 with all deadweight pressures indicated thereon as well as the flowing temperatures (gas zones only) and gravity and GOR (oil zones only).
