0 1		HWEST NEWMEXICO	) PACKER LEAKAGE	E TEST INSTRUCTIO	ONS			
1. A packer leakage test shall be comr				6. Flow Test No. 2 shall be conducted even though no leak was indicated during Flow Test No. 1. Procedure				
completion of the well, and annually thereafter as prescribed by the order authorizing the multiple completion. Such tests shall also be commenced on all multiple completions within seven days following recompletion and/or chemical or fracture treatment, and whenever remedial work has been done on a well during which the packer or				for Flow Test No. 2 is to be the same as for Flow Test No. 1 except that the previously produced zone shall remain shut-in while the zone which was previously shut-in is produced.				
the tubing have been disturbed. Tests shall also be taken at any time that communication is suspected or when requested by the Division.			7. Pressu	7. Pressures for gas-zone tests must be measured on each zone with a deadweight pressure gauge at time				
2. At least 72 hours prior to the commencement of any packer leakage test, the operator shall notify the				intervals as follows: 3 hours tests; immediately prior to the beginning of each flow period, at fifteen-minute intervals during the first hour thereof, and at hourly intervals thereafter, including one pressure measurement immediately prior to the conclusion of each flow period. 7-day tests; immediately prior to the beginning of each				
Division in writing of the exact time the			flow period, to the conclu	at least one time during e usion of each flow period.	each flow period (at ap Other pressures may	proximately the midway point) and immediately prior be taken as desired, or may be requested on wells		
			24-hou	previously shown question of oil zone tests: all pressu	res, throughout the ent	tire test, shall be continuously measured and recorded		
3. The packer leakage test shall commence when both zones of the dual completion are shut-in for pressure stabilization. Both zones shall remain shut-in until the well-head pressure in each has stabilized, provided however, that they need not remain shut-in more than seven days.				with recording pressure gauges the accuracy of which must be checked at least twice, once at the beginning and once at the end of each test, with a deadweight pressure gauge. If a well is a gas-oil or an oil-gas dual completion, the recording gauge shall be required on the oil zone only, with deadweight pressures as required				
			above being	taken on the gas zone.				
<ol> <li>For Flow Test No. 1, one zone of t while the other zone remains shut-in. Su 24 hours in the case of an oil well. Note</li> </ol>	ich test shall be continued for seven day	s in the case of a gas well an	nd for	sults of the above-describ	ed tests shall be filed in	n triplicate within 15 days after completion of the		
atmosphere due to lack of a pipeline con			test. Tests : Northwest I	shall be filed with the Azte New Mexico Packer Leak	ec District Office of the age Test Form Revised	e New Mexico Oil Conservation Division on 1 10-01-78 with all deadweight pressures indicated		
5 Following completion of Flow T-	t No. 1, the well shall again be shut-in, i	n accordance with Democrat		vell as the flowing temper	atures (gas zones only)	) and gravity and GOR (oil zones only).		
<ol><li>Following completion of Flow Test above.</li></ol>	110. I, the wen shall again be shut-lif, i	n accordance with raragrapi
