Gentlemen:

This letter is in reference to the plugged well, Jicarilla Apache Tribal 124 #6, 800FNL & 1720FEL, Section 24, T25N. R04W, Jicarilla lease number JIC124. Our records indicate that you are the approved operator for this well. This well was plugged on November 18, 2002. Conditions of Approval (COA's) attached to the approved Notice of Intent to Abandon required that the well location and access road be reclaimed within one year of the plugging date.

On June 18, 2015, the Bureau of Land Management, Farmington Field Office conducted a field inspection of the above referenced well site to evaluate the success of the final reclamation for this well site. The results of our inspection are identified below.

- 1) Location and access road have not been re-contoured.
- 2) Non-native material and oilfield debris on well pad..

A remedial reclamation plan for this well and access road is required to be submitted to this office within 30 days of receipt of this letter. Your plan must address the deficiencies identified above, including a timeframe for completing the necessary remedial earthwork and seeding.

If you have any questions or need additional information, please contact Ty Swirin at (505) 564-7701 or by email at tswirin@blm.gov.

Sincerely,

Mark Kelly
Branch Chief, Environmental Protection
