13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Please reference BLM letter of February 27, 2004, requesting permanent abandonment of the Dakota formation in the subject well. The subject well was temporarily abandoned in 1994, and as a condition of the completion of the Florance AB 31M well into the Dakota in October 2002, the Dakota was required to be abandoned (no production allowed). However, due to an error in our accounting procedures the Mesaverde and Dakota horizon codes for BLM reporting purposed were switched and production was inadvertently reported to the Dakota instead of the Mesaverde. We are in the process of making corrections and corrected production reports will be submitted to the BLM. Therefore, we respectfully withdraw our request of March 17, 2004, to permanently abandon the Dakota and request to maintain the Dakota formation in a temporary abandonment status until such time as conditions warrant permanent abandonment.
