RE: Cutting Trench Closure Report. Bridgecreek Resources. Kingsnake 34-6. Sec. 34, T31N.R15W.  
Lease #751-14-1038.

Mr. Joyner:

On the behalf of Bridgecreek Resources (Bridgecreek), Adkins Consulting Inc. (ACI) is pleased to submit this closure plan report. Closure occurred from December 16 through December 22, 2015. Photographs of the closure are located in Appendix A. Exhibit 1 shows the location of the cuttings trench in relation to the Kingsnake 34-6 wellhead.

Arriving on location (December 16<sup>th</sup>) and prior to commencement of cuttings trench excavation, Weeminuche Construction, Walsh Engineering, and Adkins Consulting determined that the approved cuttings trench was not sized to accommodate a 3 (clean):1 (cuttings) mixing ratio. Mr. Ryan Joyner was immediately notified via voicemail that a change in cuttings trench size is required. Verbal confirmation to proceed with the excavation was received later in the day, prior to excavation of the cuttings trench.

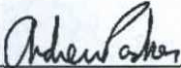

The dimensions of the cuttings trench changed from the original size as presented in the APD and SUPO. The northwest corner of the cuttings trench is 211 feet bearing 110 deg. magnetic north (MN) [101 deg. true north (TN)] from the Kingsnake 34-6 wellhead. The cuttings trench measures 61 ft (L) x 35 ft (W) x 12 ft (D). Including the 4-foot topsoil cap, the total depth of the trench is 16 ft.

The drill cuttings were mixed in the steel bins in a ratio of 3 (clean): 1 (cuttings). Stabilization occurred at a ratio of 1:1.

A confirmation sample of the mixed drill cuttings was obtained after the mixed drill cuttings were placed in the cuttings trench. The confirmation sample was obtained from a six point composite representing the buried drill cuttings matrix. The matrix of the buried cuttings was approximately 1/3 rock, 1/3 fines, and 1/3 stabilized drill cuttings.

The confirmation sample was delivered to Envirotech Environmental Laboratory for the analysis of constituents listed in the UMU Table and chloride. Analytical results are pending. Bridgecreek will submit analytical results via Sundry when the results become available.

If you have any questions or comments please contact me at 970-570-9535.
