13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

DJ Simmons, Inc. notes there has been some discrepancy about who is the current lessor. Resolution has been sought to determine the mineral lessor for this well.

Considering the above, DJ Simmons, Inc. respectfully requests Continued Shut-In status for the subject well for the following reasons:

1. The well equipment was tested as late as November 2013.
2. Last sustained production was 45 MCFD and 4 BWPD. Gas prices and production costs render the well uneconomic.
3. There are reasonably recoverable reserves left.
4. The well is equipped and ready to run using pump jack and rods to remove water.
5. We believe the well is sound and not an environmental threat.

**Valid until 01/12/17**
