Chris,

You have verbal approval to proceed once approval is granted from the BLM.

Please notify this office 24 hours prior to each test.

Thank you

Monica Kuehling NMOCD District III, Aztec

Subject: RE: New GCU 176 T&A Procedure

Monica.

Per our discussion, my understanding is that we would need to modify the proposed work and satisfy the following conditions in order for this well to be placed into approved temporary abandonment status:

- 1) Notify NMOCD and allow them to witness pressure test of casing between CIBP @ 6120' and 4009' (50' below base of holes).
- 2) Set 2nd CIBP at least 50' below base of holes (~4009')
- 3) Set cement plug on top of 2nd CIBP to at least 50' above top of holes (~3250')
- 4) Notify NMOCD and allow them to witness pressure test of casing from top of cement to surface.

Approved TA status would be good for a maximum of 5 years. Any renewal would require drilling out cement plug and top CIBP in order to repeat the above procedure prior to TA status expiration.

Please let me know if this summary is correct and if we have verbal approval to proceed.

Thank you so much for your help.

Chris
