13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Redwolf Production, Inc. has contracted the following work to be performed on this location:

1. Replace compressor scrubber tank with 210 bbl water storage tank.
2. Remove stained soils and dispose of in approved disposal facility.
3. Plumb in and berm new equipment.
4. Return well to production.

All work should be completed by April 21, 2006.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines, a general permit or an (attached) alternative OCD-approved plan.

Attn: Mr. Denny Foust

RE: J.C. Davison F No. 1R

Dear Mr. Foust:

Please find outlined below the steps taken and work yet to be completed to bring the J.C. Davidson F No. 1R location into compliance with NMOCD regulations:

1. Upon notification of the overflow of the scrubber tank, the well has remained shut-in to insure no additional overflow could occur.
2. The stock tank was emptied (see attached invoice).
3. A 210 bbl water storage tank and a replacement screw compressor have been ordered. The expected delivery date for this equipment is March 28, 2006.
4. Once this equipment is available, the existing stock tank, compressor, and separator will be removed. Any stained soils will be removed and disposed of in an approved facility. The 210 bbl water tank and screw compressor will be set, and all new equipment will be plumbed in and bermed.
5. The well will be returned to production.

We anticipate that all work will be completed by April 21, 2006.

If you have any questions or need additional information, please give me a call at (505) 326-4125.

Sincerely,

Dana L. Delventhal
