13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Elm Ridge Exploration CO LLC originally permitted this well under the Otero Chacra and the South Blanco PC formations. We completed this well in October of 2006. We perforated this well from 2904' - 2938' (South Blanco PC formation). We intended to perforate in the Otero Chacra, but have not done so, as of yet. Since first delivery, on October 23rd, 2006, this well has only produced from the South Blanco Pictured Cliffs[72439] formation. Upon further review from the OCD, this well has previously been reported under the Bisti Pictured Cliffs[97073]. The OCD will need to correct the formation and Elm Ridge will revise all production dating back to 2006 under the correct pool code of 72439.

OIL CONS. DIV DIST. 3
