Change Plans Plug and Abandon Abandon Abandon
Final Abandonment Notice Convert to Injection Plug Back Water Disposal
13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)
WPX Energy requests authorization to flare the Chaco 2308-09A #146H if a potential cross flow event may occur as a result of a nearby
Frac activity on W Lybrook UT #707H/708H/709H/747H/748H/749H. If a cross flow event on the well results in nitrogen content above Williams pipeline standards, flaring may begin as soon as 5/16/16 for 30 days, given approval. A gas sample will be collected upon the
confirmation of the cross flow and sent to a third party for results of the gas analysis. The gas analysis will be submitted upon receipt.

CHACO 2308 09A #146H Section 9-23N-8W Lease No. NMNM-18463

- Flaring is authorized pursuant to NTL 4A Part III A and IV B. As such, no royalty obligation will be incurred during the clean-up period. The flared volumes must be reported on your Oil and Gas Operation Reports (OGORs) during the flaring period.
- Flaring will be authorized until June 12, 2016 if additional time is required, please contact this office accordingly.
- Please take appropriate and necessary safety precautions at this well site during the flaring period.
