GAS CAPTURE PLAN

Date: May 25, 2016

MAY 26 2016

☒ Original

Operator & OGRID No.: WPX Energy Production, LLC OGRID No. 120782

☐ Amended - Reason for Amendment: _____

This Gas Capture Plan outlines actions to be taken by the Operator to reduce well/production facility flaring/venting for new completion (new drill, recomple to new zone, re-frac) activity.

Note: A C-129 must be submitted and approved prior to exceeding 60 days allowed by Rule (Subsection A of 19.15.18.12 NMAC).

Well(s)/Production Facility – Name of facility

The well(s) that will be located at the production facility are shown in the table below.

Well Name	API	Well Location (ULSTR)	Footages	Expected MCF/D	Flared or Vented	Comments
W LYBROOK UT #707H	30-045-35739	Sec. 12, T23N, R9W	UL:P SHL: 877' FSL & 366' FEL	844	Flared	Pipeline is currently being constructed.
W LYBROOK UT #708H	30-045-35740	Sec. 12, T23N, R9W	UL:P SHL: 860' FSL & 404' FEL	844	Flared	Pipeline is currently being constructed.
W LYBROOK UT #709H	30-045-35741	Sec. 12, T23N, R9W	UL:P SHL: 836' FSL & 461' FEL	844	Flared	Pipeline is currently being constructed.
W LYBROOK UT #747H	30-045-35742	Sec. 12, T23N, R9W	UL:P SHL: 869' FSL & 385' FEL	844	Flared	Pipeline is currently being constructed.
W LYBROOK UT #748H	30-045-35743	Sec. 12, T23N, R9W	UL:P SHL: 844' FSL & 442' FEL	844	Flared	Pipeline is currently being constructed.
W LYBROOK UT #749H	30-045-35744	Sec. 12, T23N, R9W	UL:P SHL: 828' FSL & 480' FEL	844	Flared	Pipeline is currently being constructed.

Gathering System and Pipeline Notification

Well(s) will be connected to a production facility after flowback operations are complete, if gas transporter system is in place. The gas produced from production facility is dedicated to Gas Transporter and will be connected to Gas Transporter low/high pressure gathering system located in San Juan County, New Mexico. It will require 18,950' of pipeline to connect the facility to low/high pressure gathering system. Operator provides (periodically) to Gas Transporter a drilling, completion and estimated first production date for wells that are scheduled to be drilled in the foreseeable future. In addition, Operator and Gas Transporter have periodic conference calls to discuss changes to drilling and completion schedules. Gas from these wells will be processed at Gas Transporter Processing Plant located in Sec. See Below, Twn. _____, Rng. _____, _____ County, New Mexico. The actual flow of the gas will be based on compression operating parameters and gathering system pressures.

Flowback Strategy

After the fracture treatment/completion operations, well(s) will be produced to temporary production tanks and gas will be flared or vented. During flowback, the fluids and sand content will be monitored. When the produced fluids contain minimal sand, the wells will be turned to production facilities. Gas sales should start as soon as the wells start flowing through the production facilities, unless there are operational issues on Gas Transporter system at that time. Based on current information, it is Operator's belief the system can take this gas upon completion of the well(s).

Safety requirements during cleanout operations from the use of underbalanced air cleanout systems may necessitate that sand and non-pipeline quality gas be vented and/or flared rather than sold on a temporary basis.

Alternatives to Reduce Flaring

Below are alternatives considered from a conceptual standpoint to reduce the amount of gas flared.

- Power Generation – On lease
 - Only a portion of gas is consumed operating the generator, remainder of gas will be flared
- Compressed Natural Gas – On lease
 - Gas flared would be minimal, but might be uneconomical to operate when gas volume declines
- NGL Removal – On lease
 - Plants are expensive, residue gas is still flared, and uneconomical to operate when gas volume declines

WPX Energy Production, LLC:

Gas Capture Plan: Gas Transporter Processing Plant Information

WPX Energy Production, LLC has the ability to deliver to the below listed Gas Processing Plants at any time with the gathering infrastructure that is in place today.

1. Chaco Gas Plant

Section, 16, T26N, R12W

San Juan County

New Mexico

2. Ignacio Gas Plant

Section 22, T35N, R9W

La Plata County

Colorado
