13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

It was recently discovered we did not notify the NMOCD 24 hours prior to beginning operations on the subject well. After thorough discussions with our well site leaders and engineers we have committed to re-testing the CIBP placed in the subject well within 6 months, and will notify the OCD prior to the work being performed.

Please see the attached plug back operations of the Basin Dakota performed April 2016.

This well currently produces only from the Blanco-Mesaverde formation.
