Describe Cause of Problem and Remedial Action Taken.\*

Personnel arrived on location to troubleshoot a transfer pump engine on the subject well. Fluid was removed from the engine and fuel gas system. This allowed approximately 9 cubic feet of fuel gas to be released. The engine was cranked over, and the fuel gas ignited inside the transfer pump building. Two personnel were injured, and the fire self-extinguished. No property damage occurred. The personnel were transported to medical facilities immediately.

Describe Area Affected and Cleanup Action Taken.\*  
No remediation or clean-up was required.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
