**GAS CAPTURE PLAN**

Date: December 6, 2016

☒ Original

Operator & OGRID No.: WPX Energy Production, LLC OGRID No. 120782

☐ Amended - Reason for Amendment: \_\_\_\_\_

This Gas Capture Plan outlines actions to be taken by the Operator to reduce well/production facility flaring/venting for new completion (new drill, recomple to new zone, re-frac) activity.

*Note: A C-129 must be submitted and approved prior to exceeding 60 days allowed by Rule (Subsection A of 19.15.18.12 NMAC).*

**Well(s)/Production Facility – Name of facility**

OIL CONS. DIV DIST. 3

The well(s) that will be located at the production facility are shown in the table below.

Well Name	API	Well Location (ULSTR)	Footages	Expected MCF/D	Flared or Vented	Comments
W LYBROOK UT #726H	30-045-35769	Sec. 23, T23N, R9W	UL: M 588' FSL & 613' FWL	1962	Flared	
W LYBROOK UT #728H	30-045-35770	Sec. 23, T23N, R9W	UL: M 574' FSL & 598' FWL	1670	Flared	
W LYBROOK UT #729H	PENDING APPROVAL	Sec. 23, T23N, R9W	UL: M 534' FSL & 553' FWL	1533	Flared	
W LYBROOK UT #759H	30-045-35766	Sec. 23, T23N, R9W	UL: M 601' FSL & 628' FWL	2070	Flared	
W LYBROOK UT #760H	30-045-35767	Sec. 23, T23N, R9W	UL: M 548' FSL & 568' FWL	1794	Flared	
W LYBROOK UT #761H	30-045-35768	Sec. 23, T23N, R9W	UL: M 521' FSL & 538' FWL	1590	Flared	

**Gathering System and Pipeline Notification**

Well(s) will be connected to a production facility after flowback operations are complete, if gas transporter system is in place. The gas produced from production facility is dedicated to NA and will be connected to See Below low/high pressure gathering system located in San Juan County, New Mexico. It will require 4940.8 of pipeline to connect the facility to low/high pressure gathering system. WPX Energy provides (periodically) to See Below a drilling, completion and estimated first production date for wells that are scheduled to be drilled in the foreseeable future. In addition, WPX Energy and See Below have periodic conference calls to discuss changes to drilling and completion schedules. Gas from these wells will be processed at See Below Processing Plant located in Sec. See Below, Twn. \_\_\_\_\_, Rng. \_\_\_\_\_, \_\_\_\_\_ County, New Mexico. The actual flow of the gas will be based on compression operating parameters and gathering system pressures.

**Flowback Strategy**

After the fracture treatment/completion operations, well(s) will be produced to temporary production tanks and gas will be flared or vented. During flowback, the fluids and sand content will be monitored. When the produced fluids contain minimal sand, the wells will be turned to production facilities. Gas sales should start as soon as the wells start flowing through the

production facilities, unless there are operational issues on See Below system at that time. Based on current information, it is WPX Energy belief the system can take this gas upon completion of the well(s).

Safety requirements during cleanout operations from the use of underbalanced air cleanout systems may necessitate that sand and non-pipeline quality gas be vented and/or flared rather than sold on a temporary basis.

#### **Alternatives to Reduce Flaring**

Below are alternatives considered from a conceptual standpoint to reduce the amount of gas flared.

- Power Generation – On lease
  - Only a portion of gas is consumed operating the generator, remainder of gas will be flared
- Compressed Natural Gas – On lease
  - Gas flared would be minimal, but might be uneconomical to operate when gas volume declines
- NGL Removal – On lease
  - Plants are expensive, residue gas is still flared, and uneconomical to operate when gas volume declines

#### **WPX Energy Production, LLC:**

##### **Gas Capture Plan: Gas Transporter Processing Plant Information**

WPX Energy Production, LLC has the ability to deliver to the below listed Gas Processing Plants at any time with the gathering infrastructure that is in place today.

**1. Chaco Gas Plant- Enterprise**

Section, 16, T26N, R12W  
San Juan County  
New Mexico

**2. Ignacio Gas Plant- Williams**
