NATURE OF RELEASE

Type of Release Produced Water	Volume of Release 3-5 BBLS	Volume Recovered 2 BBLS
Source of Release Tanker Truck Unit 322	Date and Hour of Occurrence	Date and Hour of Discovery
Was Immediate Notice Given? X Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Cory Smith OCD	
By Whom? Chet Murray	Date and Hour 5:30 PM on 8/31/2017	
Was a Watercourse Reached? <input type="checkbox"/> Yes X No	If YES, Volume Impacting the Watercourse. OIL CONS. DIV DIST. 3	

If a Watercourse was Impacted, Describe Fully.*
N/A

SEP 13 2017

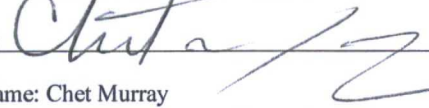

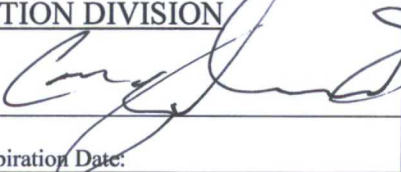

Describe Cause of Problem and Remedial Action Taken.*

- Load of produced water was being transported by CNJ Oilfield Services from the N Escavada Unit #329H.
- Truck was ran off the road by an oncoming Jeep. Driver tried to avoid head on collision by taking the shoulder. As tanker went off the roadway the truck ran into a dry wash turning the truck and tanker over.
- All CNJ drivers were instructed on corrective action plan for future actions with road traffic- 9/1/2017
- OCD and BLM were called by Chet Murray on 8/31/2017. A BIA representative was onsite shortly after the incident occurred on 8/31/2017.

Describe Area Affected and Cleanup Action Taken.*

- Small release into a dry wash from turned over tanker.
- On 9/1/2017 all hydrocarbon spots were removed by Chet Murray.
- Two confirmation soil samples (five-point composite samples) were collected from within the impacted area by Chet Murray on 9/6/2017 at 10:00AM. Cory Smith, OCD, was present for sample collection.
- Soil samples were put on ice and taken to Envirotech Analytical Laboratory for analysis of BTEX, TPH (GRO/DRO/MRO), and chlorides.
- Samples results were sent to Cory Smith via email on 9/11/2017. Confirmation sampling results were reported below OCD recommended remedial action levels for BTEX and TPH. (Laboratory analytical report is enclosed.)
- 200 LBS of gypsum was incorporated into the soil within the impacted area on 9/12/2017 at 10:00AM for chloride remediation, no further action is required. (See enclosed email.)

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Chet,

You should be ok since you're in a drainage.

Thank you for the email. We are going to do the gypsum as discussed on our phone call. We are going to apply and rake in 200lbs of gypsum today as we discussed on the phone.

The treatment plan says add fresh water. I'm guessing with it being a drainage we are not needing to do that as long as its raked in?

Once again I appreciate all you help during this with it being my first time.

Chet,

As per our conversation additional remediation will need to occur. Typically operator elect to apply gypsum to the release area please see the attached document. Please let me know what you choose to do.

Thanks,

Project Name: -
Project Number: 15034-0001
Project Manager: Chet Murray

Reported:
11-Sep-17 09:48

Notes and Definitions

SPK2 The spike recovery was outside of QC acceptance limits for the MS and/or MSD due to native analyte concentration at 4 times or greater than the spike concentration.

DET Analyte DETECTED

ND Analyte NOT DETECTED at or above the reporting limit

NR Not Reported

dry Sample results reported on a dry weight basis

RPD Relative Percent Difference
