Four Star Oil & Gas Company has plans for cleaning out the subject well and resetting the pump.

In order to set the pump deeper to unload the well better and keep all the perforations in the well open  
Four requests to deepen the well to from 6238' to 6278'.

The deepened section will not be produced but will allow the pump to be set deeper and avoid picking sand and other materials in the well bore, thus reducing the need to pull and clean out the pump.
