13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompletable horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

BP suspected casing collapsed on the tubing in the subject well. The tubing has been cut at 6867' and attempts to fish the tubing were made, leaving wash pipe on the fish from 6867' up to 6787'. BP requests approval to abandon the Dakota and Mancos completions by setting a cement retainer at 6780', pumping cement through it, and then pumping balanced cement plugs from 6780' ? 6680' and from 6230' ? 6130'. This will leave 62' of rat hole below the bottom Mesa Verde perforation. We will tag the plug to confirm its top is 6130' and pump additional cement if necessary. After the plugs are set, BP plans to run tubing and produce the Mesa Verde formation.

BP received verbal approval from both the BLM and the NMOCD to proceed with the above work on 6/25/2018.
