	District #3	THWEST NEWMEXICO	PACKER LEAKAGE	TEST INSTRUCTION	2V	
				TEST INSTRUCTION		
completion of the well, and annually the Such tests shall also be commenced on	imenced on each multiply completed we ereafter as prescribed by the order autho all multiple completions within seven da enever remedial work has been done on a	rizing the multiple completion ys following recompletion and	d/or for Flow Tes		s for Flow Test No. 1 ex	as indicated during Flow Test No. 1. Procedure cept that the previously produced zone shall oduced.
the tubing have been disturbed. Tests s requested by the Division.	hall also be taken at any time that comm	unication is suspected or whe		es for gas-zone tests must	be measured on each zor	e with a deadweight pressure gauge at time
			intervals dur	ing the first hour thereof, a	nd at hourly intervals the	ning of each flow period, at fifteen-minute reafter, including one pressure measurement
	mencement of any packer leakage test, t e test is to be commenced. Offset operat		flow period, to the conclu	at least one time during ea	ch flow period (at approx Other pressures may be t	tests: immediately prior to the beginning of each simately the midway point) and immediately prior aken as desired, or may be requested on wells
	mence when both zones of the dual comp hut-in until the well-head pressure in eac		24-hou with recordin	r oil zone tests: all pressure ng pressure gauges the accu	es, throughout the entire uracy of which must be c	test, shall be continuously measured and recorded hecked at least twice, once at the beginning and If a well is a gas-oil or an oil-gas dual

4. For Flow Test No. 1, one zone of the dual completion shall be produced at the normal rate of production while the other zone remains shut-in. Such test shall be continued for seven days in the case of a gas well and for 24 hours in the case of an oil well. Note: if, on an initial packer leakage test, a gas well is being flowed to the atmosphere due to lack of a pipeline connection the flow period shall be three hours.

however, that they need not remain shut-in more than seven days.

.

5. Following completion of Flow Test No. 1, the well shall again be shut-in, in accordance with Paragraph 3 above.

completion, the recording gauge shall be required on the oil zone only, with deadweight pressures as required above being taken on the gas zone.

8. The results of the above-described tests shall be filed in triplicate within 15 days after completion of the test. Tests shall be filed with the Aztec District Office of the New Mexico Oil Conservation Division on Northwest New Mexico Packer Leakage Test Form Revised 10-01-78 with all deadweight pressures indicated thereon as well as the flowing temperatures (gas zones only) and gravity and GOR (oil zones only).
