| | | THWEST NEWMEXICO | PACKER LEAKAGE | TEST INSTRUCTIO | INS | | | | | | |
| A packer leakage test shall be com completion of the well, and annually the Such tests shall also be commenced on i chemical or fracture treatment, and whe the tubing have been disturbed. Tests s requested by the Division. | all multiple completions within seven day never remedial work has been done on a | rizing the multiple completion ys following recompletion and a well during which the packer | for Flow Tes d/or remain shut- r or n 7. Pressur | Flow Test No. 2 shall be conducted even though no leak was indicated during Flow Test No. 1. Procedure for Flow Test No. 2 is to be the same as for Flow Test No. 1 except that the previously produced zone shall remain shut-in while the zone which was previously shut-in is produced. Pressures for gas-zone tests must be measured on each zone with a deadweight pressure gauge at time intervals as follows: 3 hours tests: immediately prior to the beginning of each flow period, at fifteen-minute | | | | | | | |
| Division in writing of the exact time the | nencement of any packer leakage test, t test is to be commenced. Offset operat nence when both zones of the dual com | ors shall also be so notified. | immediately flow period, to the conclu which have p 24-hour with recordin | prior to the conclusion of at least one time during e usion of each flow period. previously shown question r oil zone tests: all pressu- ng pressure gauges the ac | each flow period. 7- ach flow period (at ap Other pressures may able test data. res, throughout the er curacy of which must | s thereafter, including one pressure measurement day tests: immediately prior to the beginning of eac oproximately the midway point) and immediately pri be taken as desired, or may be requested on wells attire test, shall be continuously measured and record be checked at least twice, once at the beginning an | ior led | | | | |
| stabilization. Both zones shall remain showever, that they need not remain show | hut-in until the well-head pressure in eac | | once at the e completion, | | | uge. If a well is a gas-oil or an oil-gas dual zone only, with deadweight pressures as required | | | | | |
| | | ys in the case of a gas well and gas well is being flowed to the | for 8. The res | | | n triplicate within 15 days after completion of the te v Mexico Oil Conservation Division on Northwest | st. | | | | |

| 5. | Following c | ompletion | of Flow | Test No | . 1, | the well | shall | again | be shut-in, | in | accordance | with | Paragraph | 3 |
|------|-------------|-----------|---------|---------|------|----------|-------|-------|-------------|----|------------|------|-----------|---|
| abov | /e. | | | | | | | | | | | | | |
