13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Enduring Resources inadvertently drilled the **S ESCAVADA UNIT 352H (30-043-21323) & S ESCAVADA UNIT #353H (30-043-21320)** from an incorrect surface hole location. The 352H well was drilled from the permitted surface hole location for the 353H well and the 353H well was drilled from the permitted 352H surface location. The surface location is the ONLY discrepancy from the approved APD's and the remaining portions of each well is drilled as approved. This discrepancy is simply a 20 foot difference at the surface location and we request to correct the surface hole latitude and longitude for each well respectively. Attached are updated As Drilled C102's.

Notifications to both BLM and OCD were conducted on September 26, 2018.
