13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The Candado #7 plugged and abandoned on 7-31-2018.

On 12-13-18, Robert Switzer of the BLM-FFO and Paul Lehrman of DJR Operating, LLC visited the site. The site has had all surface equipment removed (Well Head, Separator, Meter Run and all above ground facilities associated with the well, along with any underground facilities within the well pad boundaries. Also removed was a Drip, Enterprise Meter run and pipeline tie-in to the north.

The site has been re-contoured, reseeded and all other specified requirements per the Reclamation Plan as approved by the BLM-FFO.

Per Robert Switzer, BLM-FFO AO, the site has been found to comply with the interim requirements under the BLM guidelines and the Reclamation Plan.

Final Reclamation/FAN will be forthcoming as the site meets BLM final reclamation vegetation standards.

See pictures of interim reclamation attached hereto.
