13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

The Lenis A Shane USA 001 well plug and abandonment was completed on 4/26/2016. This well is located on the same well pad with the Shane Gas Com 001 A API 30-045-22666 which is a BP active well and the Federal 29 9 14 002 API30-045-28263 well which is an active Southland Royalties well. All equipment associated with the Lenis A Shane USA 001 well has been removed; however final reclamation of the location cannot be performed until such time that the active wells are plugged and abandoned. On August 30, 2018 BLM Representative Randy McKee and BP Representative Sabre Beebe visited the location to discuss Final Abandonment completion. Mr. McKee concurred that the location cannot be reclaimed until the active wells are plugged and approved BP for FAN on the Lenis A Shane USA 001 well. Should you have any questions or concerns regarding this well please contact Sabre Beebe at 970-779-9398 or sabre.beebe@bpx.com
