	NORT	HWEST NEWMEXICO P	ACKER LEAKAGE	TEST INSTRUCTIO	NS			
	mmenced on each multiply completed wel					k was indicated during Flow Test No. 1. Procedure		
Such tests shall also be commenced on	tereafter as prescribed by the order author all multiple completions within seven day	s following recompletion and/	or remain shut-i	for Flow Test No. 2 is to be the same as for Flow Test No. 1 except that the previously produced zone shall remain shut-in while the zone which was previously shut-in is produced.				
the tubing have been disturbed. Tests	enever remedial work has been done on a shall also be taken at any time that comm							
requested by the Division.						zone with a deadweight pressure gauge at time eginning of each flow period, at fifteen-minute		
2. At least 72 hours prior to the con	nmencement of any packer leakage test, th	e operator shall notify the				thereafter, including one pressure measurement lay tests: immediately prior to the beginning of each		
	e test is to be commenced. Offset operate					proximately the midway point) and immediately prior be taken as desired, or may be requested on wells		
				reviously shown question r oil zone tests: all pressur		ire test, shall be continuously measured and recorded		
3. The packer leakage test shall commence when both zones of the dual completion are shut-in for pressure stabilization. Both zones shall remain shut-in until the well-head pressure in each has stabilized, provided once at the end of each test, with a deadweight pressure gauge. If a well is a gas-oil						be checked at least twice, once at the beginning and		
however, that they need not remain shut-in more than seven days.								
A For Flow Test No. 1 and a f	Felse dual completion shall be assured as	the normal rate of re-		 				
while the other zone remains shut-in.	If the dual completion shall be produced at Such test shall be continued for seven day to if on an initial people lookers test a c	s in the case of a gas well and fo		ulte of the shows doors" -	d taoto chall he filed !-	triplicate within 15 days after some lating of the sure		
atmosphere due to lack of a pipeline connection the flow period shall be three hours. Tests shall be filed with the Az				e filed with the Aztec Dist	rict Office of the New	triplicate within 15 days after completion of the test. Mexico Oil Conservation Division on Northwest		
						with all deadweight pressures indicated thereon as y and GOR (oil zones only).		
	st No. 1, the well shall again be shut-in, in	accordance with Paragraph 3						
above.
