13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Attached is the successful MIT for the NEBU 404 Pressure Observation Well run 6/11/2019 and witnessed by NMOCD personnel.

When the previous MIT was run on 8/15/18, it failed. At the time, BP thought the issue was a hole in the tubing and planned to test and repair the tubing per the sundry approved by the BLM on 11/6/2018 and the NMOCD (scanned 2/11/2018).

While running the 2019 MIT, the tubing was tested and it held. POH and tested the casing, the packer failed. The packer was damaged causing the 2018 MIT failure. The packer was replaced on 6/11/2019 and a successful MIT was completed.

The MIT chart is attached.

Pressure reports need to be filed as this is a Pressure Observation well
