RE: Recent Meeting
Bois d' Arc Encino 15 # 1
& Surface Casing/Cement Issues

Dear Jim,

A-15-20N-5W

I am just writing to thank yourself, Brian Davis, and Steve Hayden for visiting with Patrick Hegarty & myself at your office in Farmington on Thursday, January 3rd, 2002.

We appreciate your input and your understanding of the challenges we have experienced with the Encino 15 # 1 well and the surface casing and cementing issues associated with our Menefee Coal test program.

We will continue to improve our communication with all parties involved in the approval of our well activities. I just wanted to re-iterate our commitment to inform and involve the appropriate governmental parties in the critical activities on all our wells.

As soon as I receive some additional information from BJ services regarding cement slurry design, and confirm the formation tops with Chip Harridan and Steve Hayden, Synergy will be submitting a detailed cement remediation and completion plan for the Encino 15 # 1 well for your approval.

This plan will be submitted with a proper sundry intent notice. Thank you again for the opportunity to discuss our well activity, and we look forward to future update meetings regarding our Menefee Coal test program.

Best regards,

Thomas E. Mullins
Engineering Manager
