☐ Abandonment

☐ Recompletion

☐ Plugging

☐ Casing Repair

☐ Altering Casing

☐ Change of Plans

☐ New Construction

☐ Non-Routine Fracturing

☐ Water Shut off

☐ Conversion to Injection

☒ Other - Production

13. Describe Proposed or Completed Operations

This sundry is to inform the BLM and OCD that this well was left until spring time with the Frac plug in place separating the DK and MV production. When completing the well both the MV and DK intervals were perforated and frac'd (see completion reports). After flowing back the MV interval we RIH to mill out the frac plug and experienced a downhole fire. We successfully pulled out of the hole with the mill and work string, and since it was so close to the Forest closure period decided to RIH with the tubing and produce the well.

We are going to report the production as MV gas until we can evaluate the situation and return in the spring and mill out the frac plug and then commingle the gas. Since we aren't unable to know the exact condition of the frac plug reporting production this was the best choice for now and then adjustments may be made when we get back on the well in the spring and see differently. The BLM (Steve Mason) and OCD (Henry V) were made aware of the situation.

14. I hereby certify that the foregoing is true and correct.
