	<input type="checkbox"/> Altering Casing <input type="checkbox"/> Conversion to Injection

13. Describe Proposed or Completed Operations

Request to change well plan.

This will be a mud drilled well due to its location. The following changes will be made:

Surface- 8 5/8" casing set @ 320'. Cement will be adjusted accordingly.

Intermediate- No changes.

Production- Drill with a 7 7/8" bit down to 7559' with mud instead of air, top-setting the Morrison formation. TD may be deepened to about 7599', depending on mud logger's findings. 4 1/2" N-80 Casing will be set @ TD. Cement will be adjusted accordingly; pumping 50% excess of open-hole volume. We will likely perform a 2-stage cement job with a DV tool above the Point Lookout.

Mud properties will be adjusted as hole dictates, adjusting viscosity, density, and LCM concentration as needed.

14. I hereby certify that the foregoing is true and correct.
