13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

We request permission to change plans on this well and drill a single Blanco Mesaverde well instead of a Blanco Mesaverde / Basin Dakota commingle as originally permitted.

During drilling operations, we lost circulation and left fish in the hole from 5390' to 5476' (top of Mancos @ 5485'). Prior to fish being lost we drilled to 6397' TD. Top of Gallup formation @ 6453' was never penetrated. We plan to set 4 1/2" csg above fish @ 5390' and cement csg with adjusted volumes, circulating as proposed in APD. We will perforate and stimulate MV interval only.
