13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Western Minerals requests a time extension on this well's approved APD for one year to 8/10/08. New well drilling economics indicates that this well would not be economical in the Mesaverde alone, but will need the Pictured Cliffs and Chacra open to production also. Currently, we can not open the additional zones due to State spacing rules. However, we believe that the State will allow the Chacra and Pictured Cliffs well density to go from 160 acres to 80 acres in the near future, which should make this well much more favorable economically.

APD will expire 8/10/2008
