The elevation of the derrick floor above sea level is 5846 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was spudded on 5/12/57 and on that day 8-5/8" casing was set at 172' with 120 sacks cement. After waiting on cement for 24 hours casing and water shut-off were tested with 500 pounds for 30 minutes with no drop in pressure.

On May 15, 1957, 5-1/2" casing was landed at 2240' and cemented with 180 sacks cement. After waiting on cement for 48 hours, casing and water shut-off were tested with 1000 pounds for 30 minutes with no drop in pressure.

Completion operations were begun.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
