	<input type="checkbox"/> Non-Routine Fracturing
	<input type="checkbox"/> Water Shut-Off
	<input type="checkbox"/> Conversion to Injection
	<input type="checkbox"/> Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

5/1/99 - 5/17/99 Elm Ridge Resources Inc. drilled the Callow #7 to 1740' K.B. through the Pictured Cliffs. The Pictured Cliffs was perforated from 1602-04' & 1633-38'. The perf's were broken down w/500 gals. 15% HCL and the well was shut-in for 10 days. After 10 days there was only 10 PSI on the casing. A cast iron bridge plug was set @ 1580' K.B. and pressure tested to 2000 PSI. The Fruitland Coal was then perforated from 1458'-1570' (gross interval) and frac'd w/10,000# 40/70 Arizona sand followed by 90,000# 12/20 Brady sand w/67,000 gals Delta 140 sand wedge. The well was flow tested on 5/17/99 for 56 mcf/gpd and 8 BWPD. It is currently shut-in pending necessary approvals.

14. I hereby certify that the foregoing is true and correct
