DIV.****DIST. 3****13. Describe Proposed or Completed Operations**

As per the conditions of approval for the subject wells' APD we reporting that a compressor will be set. The compressor is owned by Sooner B&B and the Unit number is #2BB-156. The compressor package has a 5.7L V-8 GM industrial motor plated for 155 hp with 65 useful 65 ph at altitude and derated. The motor is packaged with a Curtis-Toledo NAGC98 compressor. The compressor is a 2-stage recip with single acting (head end) 7-1/2" and 4-3/16" cylinders. The unit is certified by Sooner B&B to meet 2-gr/hp-hr NOx emissions. The compressor will more than likely be on the location for the life of the well. For noise abatement the compressor has been surrounded by a three sided roofed building. A noise survey was conducted even though we show this location is in the BLMs Noise Sensitive Area or raptor nesting area (see attached).
