13. Describe Proposed or Completed Operations

Burlington Resources requests permission to set a CIBP 50' above the DK perforations to TA the Dakota production on this well. Plans will be to flow this well as a MV only until we can drill and complete the SJ 27-5 #59G (horizontal Dakota well) and test production. The 59G is part of a horizontal pilot and consequently the lateral crosses through the NE/4 and ends up in the NW/4 of Section 6. There are already two existing DK/MV wells in the NE/4 and if the 59G proves to be a good well we will either take the 59G to hearing to gain a density exception or plugback the SJ 27-5 #59 Dakota interval to remain in compliance. Either way, we will not produce more than two Dakota intervals at one time until the exception is approved.

We are hoping this approval will allow us to lift the "hold" on the C104 for the SJ 27-5 #59G once the subsequent sundry showing the TA procedure has been completed on the SJ 27-5 #59.

14. I hereby certify that the foregoing is true and correct.
