13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

The production string for the Carson #302 needs to be changed to 3 1/2" 9.2# L-80 in order to fit inside of the 5 1/2" intermediate liner.

Drift diameter of 5.5" liner, 4.767" is too small to accommodate the proposed 4.5" production casing. Therefore, it is only feasible to decrease the production casing to 3.5". The 5.5" liner was set due to down hole problems. Refer to sundry dated 8-21-2008
