Gentlemen:

The above referenced well is a Pictured Cliffs/Mesaverde/Dakota commingle. Attached is a copy of the allocation for the commingling of the subject well completed on September 18, 2001. DHC-2874 was issued for this well.

Gas:	Pictured Cliffs	5%
	Mesa Verde	72%
	Dakota	23%

Oil:	Pictured Cliffs	0%
	Mesa Verde	0%
	Dakota	100%

The gas percentages are based upon reserves assigned to each formation founded on production from the respective formations before and after workover operations. Because condensate production did not increase with the addition of the Mesaverde formation, the oil has been allocated solely to the Dakota formation. Please let me know if you have any questions.

Sincerely,

Peggy Cole
