13. Describe Proposed or Completed Operations

Calls were placed to the BLM (Troy Saylers) and OCD (Kelly Roberts) on 2/27/09 to inform the agencies that the production casing will be removed on this well for reuse on another well. The intermediate casing setting depth was @ 5112' and the TOC was found to be @ 3940' (1700'+ overlap). A free point will be used to determine where the free pipe started and the casing will be cut off above that point and used elsewhere in COPC drilling operations. Saving money was the motive for this action. Both the BLM and OCD gave verbal approval to cut this casing off and remove. The Production casing will now be cemented liner instead of full string of casing.
