13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The South Hospah #9 had been drilled and cased through the Entrada Zone to 3933'. The Entrada perforations at 3800'-3829' have been squeezed off and TOC has been tagged at 3710'. It is the intent of NOG to re-enter this wellbore, drill out cement plug and TD to determine wellbore integrity. Squeeze off possible perforations in the Dakota sand, perforations will be determined by Wireline CCL and perforations in the lower Gallup zone at 1645'. The TOC on the casing annulus has been calculated at 650'. The 7" will be squeezed from 650' to surface. The Entrada will then be perforated and tested for use as a disposal well. The disposal application will be sent to the New Mexico UIC department for approval.
