If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.

**Well produced ~200 bbl over night overrunning below grade tank. Below grade tank had been pulled dry prior day, but water production exceeded anticipated volumes. Above ground Production tank temporarily offline to repair valving and piping. All water contained in secondary containment around BGT.**

Describe Area Affected and Cleanup Action Taken\*

**Vac truck to recover water from containment and BGT. Schedule additional vac trunk pickups until production tank can be put back on line.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
