- 13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy Inc., intends to re-frac and open additional pay in the Basin Fruitland Coal zone of this well per the attached procedure.

Fruitland Coal Re-fracture and Open Additional Pay

XTO Energy proposes to re-fracture the existing Fruitland Coal perforations and open additional Fruitland Coal perforations in the Ropco 4 #1. Currently, the Fruitland Coal is open from 874' – 924', and the Pictured Cliffs is open from 930' – 940'. The two formations are down-hole commingled. A plug will be set at 926' to isolate the Pictured Cliffs perforations from the Fruitland Coal perforations during fracturing operations. A total of 28 new perforations will be added in the Fruitland Coal from 819' – 835'. The Fruitland Coal perforations from 819' – 924' will be fractured with 203,500 lbs sand. After fracturing operations are complete, the plug at 926' will be removed, and the Pictured Cliffs and Fruitland Coal will again be down-hole commingled.
