13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

**XTO Energy Inc. proposes to re-perf & re-frac the Mesaverde formation per the following procedure:**

We will re-perforate the Mesaverde from 4048-4104 at 4 JSPF, total of 115 holes. Acidize these perfs with 2500 gals 15% HCl, frac with 190,000# 20/40 proppant carried by a cross linked fluid. We then plan to clean out and run a step rate test starting at 0.25 BPM and increase the rate to either 8 BPM or a maximum pressure of 2,200 psig (increase in 0.5 BPM increments). We will then return this well to injection.
