Albuquerque, New Mexico

Att: Mr. H.E. Shillander

Dear Mr. Shillander:

We recently wrote you requesting that proper forms be filed covering your #3 Drought-Booth well in Section 4-15N-16W. We have received your reply in which you state that the well has not been completed and that you are waiting to complete it before filing needed information.

Our rules require that Form C-103 be filed within 10 days following completion of each operation on the well. We would like to have Form C-103 filed immediately giving the following information: Spud date, where surface casing is set and cemented and the amount of cement used and similar information on any other casing which was run in the hole. Also state on the Form C-103 what the present status of the well is and when it is intended to additional work on the well.

You may delay filing Form C-105 until such time as you have decided whether to attempt to complete the well as a producing well or to plug and abandon.

Yours very truly

Emery C. Arnold

Attn: Mr. H.E. Shillander

Dear Mr. Shillander:

We recently wrote you requesting that proper forms be filed covering your 4-Drought-Proof well in Section A-124-104. We have received your reply in which you state that the well has not been completed and that you are waiting to complete it before filing needed information.

Our rules require that Form O-103 be filed within 10 days following completion of each operation on the well. We would like to have Form O-103 filed immediately giving the following information: Kind of well, where surface casing is set and cemented and the amount of cement used and similar information on any other casing which was set in the hole. Also state on the Form O-103 what the present status of the well is and when it is intended to additional work on the well.

You may delay filing Form O-103 until such time as you have decided whether to attempt to complete the well as a producing well or to plug and abandon.

Yours very truly

Emery C. Arnold
Inspector, District #3
