

Gallup Dome, Inc.

Gallup, New Mexico

7-11-49.

Mr. Al Greer
Aztec, New Mexico.

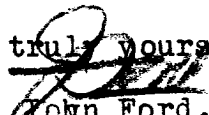

Dear Mr. Greer:

We are figuring on plugging and abandoning our well as we have a deal pending whereby a new company would drill a new hole.

You have a diagram of this well, showing 1780 ft of seven inch casing, and approx 900 ft. of 4½ inch drill pipe stuck in the hole. It may be that we may want to go into this hole at a later date, therefore, in connection with the plugging and abandoning, as per your specifications I trust that you will keep this important fact in mind.

Also, will this require your presence? If so please advise me as to when you want us to do this, a couple of days in advance if possible. And I understand that there are certain forms that you will want us to fill out. Could you supply us with same? With kindest personal regards,

Very truly yours,

John Ford.
