DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Well was drilled to T. D. of 2347 in 1957 by Marion Oil Company. No report submitted to U. S. G. S. Halliburton Oil Well Cementing Co. Reports indicate the well was plugged with 190 sacks of cement from 2267 to surface.

In accordance with agreement between surface land owner and lessee, no dry hole marker was erected and the pits were left open. Cellar and rat hole have been filled.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
