Well No. 1 is located 1650 ft. from N line and 1650 ft. from E line of sec. 19

NW 1/4 SE 19 16 N 5 W N.M.P.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

McKinley New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The drill site has been cleaned up, the pit is filled, and we wish to abandon this well as it is now producing approximately 150 gallons of water per minute. The use of this water is very beneficial for the HLM and to the rancher who is grazing cattle in this area. There was no oil or gas of any kind encountered in the drilling of this well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
